# Test plan

Date: April 20, 2026
Project: Manual Testing - "OrangeHRM Demo" Website
Prepared By: Humayra Siddika Maharun

## Objectives

The objective of this project is to perform **manual testing** on selected modules of the "OrangeHRM Demo" web application. The testing focuses on validating the functionality, usability and data handling of the system. Key objectives include verifying the Login functionality and the "My Info" module (Personal Details section), ensuring proper input validation, and identifying defects through structured test case execution.

## Test Scope

The testing focuses on validating the Login module and the "My Info" Personal Details section of the "OrangeHRM Demo" application. Test cases are created based on the user interface and system behavior; black-box testing is applied to verify functionality, input validation and error handling. The testing is performed manually in a web browser environment after the application becomes accessible.

## Test Approach

This project follows a **manual testing** approach using **black-box testing** techniques, where the system is tested without knowledge of internal code structure.

- **Testing Type:**
  - Functional Testing
  - UI Testing
- **Test Design Techniques:**
  - Boundary Value Analysis
  - Equivalence Partitioning
- **Test Execution:**
  - Test cases created based on observed system behavior
  - Both positive and negative scenarios covered
  - Results are documented as Pass/Fail
- **Bug Reporting:**
  - **Bugs documented with:**
    - Steps to reproduce
    - Expected vs Actual result
    - Severity & Priority

## Test Environment

- **Operating System:** Windows 10
- **Browser:** Google Chrome
- **Website:** OrangeHRM Demo
- **Internet Connection:** Stable broadband

## Tools Used

- Microsoft Excel (Test Cases & Bug Reports)
- Jira (for bug tracking - simulated)

## Features to be Tested

- Login Page:
  - Valid login
  - Invalid login
  - Empty fields validation
  - Error messages
- My Info - Personal Details:
  - View personal details
  - Edit and save data
  - Field validations
  - Required fields behavior

## Features not to be Tested

- Forgot Password
- Dashboard analytics
- Other HR modules
- API, Performance and Automation testing

## Entry & Exit Criteria

**Entry Criteria:**

- Website is accessible
- Test environment is ready

**Exit Criteria:**

- All test cases executed
- Bugs identified and documented
- Test summary prepared

## Deliverables

- Test Plan
- Test Cases
- Bug Report
- Test Summary Report

## Risks & Limitations

- Testing is limited to selected modules only
- No access to backend or database validation
- Results depend on demo environment stability
