Test Summary

Date: 27 April 2026
Prepared By: Humayra Siddika Maharun
Project: Manual Testing - "OrangeHRM Demo" Website
Application Under Test: OrangeHRM Demo
Test execution environment: Windows 11, Google Chrome

Introduction

This document summarizes the results of **manual testing** performed on the "OrangeHRM Demo" web application. The testing focused on validating the functionality and usability of the Login module and the "My Info - Personal Details" section.

The objective of the testing was to **verify system behavior**, **validate input handling** and **identify defects** through structured test execution.

Testing Scope

The following modules were tested:

- Login Module
- My Info - Personal Details Section

Testing included:

- Functional Testing
- UI Validation
- Input Field Validation
- Positive and Negative Test Scenarios

Test Execution Summary

Metric	Result
Total Test Cases	69
Executed Test Cases	69
Passed Test Cases	46
Failed Test Cases	23
Blocked Test Cases	0
Not Executed	0

Defect Summary

Severity Level	Number of Defects
Critical	0
High	12
Medium	11
Low	0

Key Findings

- Login validation worked correctly for most invalid input scenarios.
- Some input fields in the Personal Details section accepted invalid and unexpected data.
- Certain fields did not properly restrict special characters or invalid formats.
- Most core functionalities worked correctly under normal user conditions.
- Error messages were displayed properly in most negative test cases.

Tools Used

- Microsoft Excel – Test case design and execution
- Jira – Bug tracking and defect reporting

Testing Challenges

- Testing was limited to selected modules only.
- No backend or database validation access was available.
- The demo environment occasionally responded slowly during execution.

Conclusion

The **manual testing** of the "OrangeHRM Demo" website was completed successfully based on the defined test scope. A total of **69 test cases** were executed covering both positive and negative scenarios. During testing, **23 defects** were identified, documented and tracked using a **Jira-style** bug reporting format with appropriate severity and priority levels.

Overall, the tested modules demonstrated stable core functionality, although several validation and usability issues were observed and reported.

Deliverables

The following deliverables were completed during this project:

- Test Plan
- Test Cases
- Bug Report
- Test Summary Report
